2022

DISTRICT 11 HEALTH PROFILE
A DATA SNAPSHOT OF MIAMI-DADE AND MONROE COUNTIES

Mission: The Health Council of South Florida (HCSF) is to be the source of unbiased health and quality of life data and analysis; the preferred partner for quality program planning, management, evaluation, and community services; the facilitator of collaboration and partnerships in Miami-Dade and Monroe counties; and the trusted champion for ethical and targeted healthcare policy at the local, state, and national levels.

INTRODUCTION

The Health Council of South Florida (HCSF) District 11 Health Profile shows key social determinants of health indicators that reflect or contribute to health and wellness in Miami-Dade and Monroe counties. Health indicators for Miami-Dade and Monroe counties are comparable to other counties, state, and national data, when available. However, disparities in various health conditions among population or people groups based on race, ethnicity, sex, age, education, and income must be considered when observing data.

Indicators are grouped into thirteen (13) general sections with an attempt to capture the top ten (10) leading causes of death and high-cost Emergency Department visits for District 11.

- Population Demographics
- Social and Economic Indicators
- Access to Care
- Maternal and Child Health
- Crime and Public Safety
- Health Care Utilization
- Preventive Health
- Infectious Diseases (e.g., COVID-19)
- Behavioral Health and Substance Use
- Diversity
- Measures of Health Status
- Seniors
- Miscellaneous

ABOUT HCSF

The HCSF is one of eleven local health councils created by S 408.033 to coordinate health services planning across the state. Serving District 11 (Miami-Dade & Monroe Counties), HCSF offers a variety of contracted services. Let our team of experienced and knowledgeable staff help you with your next project!

SERVICES	PROGRAMS
Community Health Needs Assessments (CHNAs)	Ryan White Care Part B: Monroe County
Hospital Needs Assessments (990 Requirement)	Miami Matters Data Platform
Customized Health Data Report Cards	Health Insurance Open Enrollment/Marketplace Assistance
Program/Project Evaluation	Housing Opportunities for Persons with AIDS (HOWPA)
Data Gathering, Analysis and Reporting	Miami-Dade Health Action Network (M-DHAN)
Grant Research, Writing and Management	Healthy West Kendall (Data Dashboard)
Quality Assurance and Improvement	Community Connections Program
Coalition and Partnership Building	Southeast Florida Cancer Control Collaborative (SFCCC)

For questions regarding this report, or for more information associated with additional analysis, please email the HCSF at healthcouncil@healthcouncil.org

How Is This Information Useful?

Indicators contribute to a comprehensive picture of the health of the community in Miami-Dade and Monroe counties and this report is relevant and useful to state government and community-based organizations working to make a positive impact on policy or service changes.

Disclaimer: All data elements included in this report derive from the most recent data available for publication. The inclusion of information prior to 2023 is the result of data being released and published according to different reporting cycles, which usually precedes the current reporting year of this report (2022); such as the quarterly hospital utilization reports published by the Agency for Health Care Administration (fourth quarter 2022 hospital utilization report will be available for publication after May 2023). In addition to the information depicted in this report, zip code and GIS mapping analysis for Miami-Dade and Monroe counties could also be conducted for: communicable diseases, demographics, Emergency Department utilization, hospital utilization, household income, leading causes of death, and maternal and infant health indicators.

MIAMI MATTERS

MEASURING WHAT MATTERS IN MIAMI-DADE COUNTY

Miami Matters, an initiative of the Health Council of South Florida, serves as a dynamic, interactive web-based intelligence platform with publicly available information that provides easy to understand health, environmental and other quality of life indicators for Miami-Dade County. This online web application serves as a roadmap for collaborative community planning and links its visitors to promising or evidence-based practices and resources that encourage and promote informed community action. This online data dashboard may be used by:

Consultants/Grant Writers	Legislators	Health/Social Service Providers
Government Agencies	Community-Based Organizations	Researchers
County Health Departments	Hospitals	Community Health Centers

To explore Miami Matters, visit the website: www.MiamiDadeMatters.org
